

CleanBC Better Homes New Construction Program

Terms and conditions—Rebate Eligibility Requirements

Effective date: For building permits issued on or after April 1, 2020

GENERAL ELIGIBILITY REQUIREMENTS:

1. Home must be constructed by a licensed residential builder with a GST number and a valid B.C. business license or an **owner builder** authorized by BC Housing.
2. Home must be constructed in compliance with Part 9 of the BC Building Code and, where applicable, the municipally-adopted minimum BC Energy Step Code requirement.
3. Home must be a year-round primary residence and one of the following types of residential buildings:
 - a. single family home (detached dwelling);
 - b. laneway home (detached dwelling);
 - c. duplex (semi-detached dwelling); or
 - d. row home or townhome (attached dwelling).
4. The following types of homes are not eligible:
 - a. multi-unit residential buildings such as condominiums, high-rises and apartment buildings;
 - b. garages, workshops and outbuildings; and
 - c. additions to existing homes.
5. Home must be located within the electrical service area of one of the following utilities:
 - a. BC Hydro; or
 - b. New Westminster Electric Utility.
6. Homes in Non-Integrated Areas of the electricity grid must contact betterhomesbc@gov.bc.ca for pre-approval prior to pre-registration.
7. Each home or unit in a duplex, row home, or townhome must be individually metered.
8. An applicant may be a licensed residential builder, owner builder authorized by BC Housing or a **Program Qualified Energy Advisor** that is applying on behalf of a builder. The **Energy Advisor Appointment Consent Form** must be completed by a builder who is authorizing and appointing an energy advisor to apply on their behalf.
9. Applicants can apply for either the Heat Pump pathway or Energy Step Code pathway. Only one pathway may be selected.
10. Applicants must receive a heat pump rebate or an Energy Step Code rebate in order to apply for the Energy Advisor Support rebate and/or All-Electric Bonus rebate.
11. Heat pump rebates cannot exceed the cost on the invoice and the paid cost of the heat pump.
12. Heat pump rebates, Energy Step Code rebates, Energy Advisor Support rebates, and the All-Electric Bonus rebate can only be claimed once per home or unit.

13. Program rebates may be combined with municipal Energy Step Code–related offers.

14. Program rebates cannot be combined with the Zero Emissions Building Exchange’s (ZEBx) Near Zero offer.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.

CleanBC Better Homes New Construction Program

Terms and conditions—Rebate Eligibility Requirements

Effective date: For building permits issued on or after April 1, 2020

Heat pump pathway

AIR SOURCE HEAT PUMP

Rebate requirements:

- The new heat pump must:
 - be sized to function as the primary heating system for the home;
 - serve a main living area (e.g. family room, living room or open-concept kitchen-living room);
 - have an AHRI certified reference number that references all components of the heat pump; and
 - be listed as a qualifying system on the **Qualified Heat Pump Product List**.
- The new heat pump must be installed by a contractor with a GST number and a valid B.C. business license for the trade related to the system being installed (e.g. Contractor—Electrical, Contractor—Heating, Inter—Municipal Business License for trades and construction).
- Air source heat pumps with fossil fuel back up (dual fuel systems) are not eligible.

Heat pump type	Efficiency requirements
Variable speed mini-split, multi-split or central system (Tier 2)	1. SEER \geq 16; HSPF (Region IV) \geq 9.30 2. Variable speed compressor

Upgrade	Rebate	Rebate maximum
Variable speed mini-split, multi-split or central system (Tier 2)	\$3,000	Maximum one primary space heating system rebate per home or unit, regardless of the number of systems installed.

Supporting documentation:

- Paid invoice (**see sample invoice for requirements**).

Deadlines:

- Complete your project within 12 months of the date of your pre-approval confirmation email.
- Submit the post-construction application and required supporting documentation within 6 months of the date of your heat pump installation invoice.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.

Terms and conditions—Rebate Eligibility Requirements

Effective date: For building permits issued on or after April 1, 2020

Heat pump pathway

AIR-TO-WATER HYDRONIC HEAT PUMP OR COMBINED SPACE AND WATER HEAT PUMP

Rebate requirements:

1. The new air-to-water hydronic heat pump or combined space and water heat pump system must:
 - a. be sized to function as the primary heating system for the home;
 - b. serve a main living area (e.g. family room, living room or open-concept kitchen-living room); and
 - c. be listed as an eligible system on the **Air-to-Water Heat Pump Qualifying List**.
2. The new heat pump must be installed by a contractor with a GST number and a valid B.C. business license for the trade related to the system being installed (e.g. Contractor—Electrical, Contractor—Heating, Inter—Municipal Business License for trades and construction).

Upgrade	Rebate	Rebate maximum
Air-to-water hydronic heat pump	\$3,000	Maximum one primary heating system rebate per home or unit, regardless of the number of systems installed.
Combined space and water heat pump	\$4,000	Maximum one primary space heating system rebate and one primary water heating system rebate per home or unit, regardless of the number of systems installed.

Supporting documentation:

1. Paid invoice (see sample invoices for requirements—**sample 1** and **sample 2**).

Deadlines:

1. Complete your project within 12 months of the date of your pre-approval confirmation email.
2. Submit the post-construction application and required supporting documentation within 6 months of the date of your heat pump installation invoice.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.

Terms and conditions—Rebate Eligibility Requirements

Effective date: For building permits issued on or after April 1, 2020

Heat pump pathway

HEAT PUMP WATER HEATER

Rebate requirements:

1. The new heat pump water heater must be the home's primary water heater.
2. Eligible systems are listed as Tier 2 or higher on the Northwest Energy Efficiency Alliance's (NEEA) **Advanced Water Heater Specification Qualified Products List for Heat Pump Water Heaters**.
3. The new heat pump must be installed by a contractor with a GST number and a valid B.C. business license for the trade related to the system being installed (e.g. Contractor—Electrical, Contractor—Heating, Inter—Municipal Business License for trades and construction).

Heat pump type	Rebate	Rebate maximum
Heat pump water heater	\$1,000	Maximum one primary water heating system rebate per home or unit, regardless of the number of systems installed.

Supporting documentation:

1. Paid invoice ([see sample invoice for requirements](#)).

Deadlines:

1. Complete your project within 12 months of the date of your pre-approval confirmation email.
2. Submit the post-construction application and required supporting documentation within 6 months of the date of your heat pump installation invoice.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.

Terms and conditions—Rebate Eligibility Requirements

Effective date: For building permits issued on or after April 1, 2020

Energy Step Code pathway

ENERGY STEP CODE REBATE

Rebate requirements:

1. The new home must:
 - a. be constructed in compliance with Part 9, Subsection 9.36.5 or 9.36.6 of the BC Building Code and, where applicable, the municipally-adopted minimum BC Energy Step Code requirement, or receive Passive House certification by a Passive House Institute accredited building certifier;
 - b. be modelled and demonstrate compliance with the BC Energy Step Code in accordance with the BC Energy Compliance Report – Performance Paths for Part 9 Buildings – Instruction Manual, as updated from time to time, or in compliance with the Passive House Standard; and
 - c. use electric space heating and water heating systems.
2. If the home does not achieve the targeted Energy Step Code step indicated on the pre-registration form, the rebate amount will be determined by the step achieved, given that a minimum of Step 3 and/or the municipally-adopted BC Energy Step Code requirement are met.
3. Energy Step Code pathway builders are required to work with a **Program Qualified Energy Advisor**.

Rebate type	Energy Step Code step	Rebate	Rebate maximum
Energy Step Code Rebate	Step 3	\$4,000	Maximum one Energy Step Code Rebate per home or unit.
	Step 4	\$6,000	
	Step 5*	\$10,000	

* Passive House certified homes will receive an equivalent rebate to Step 5 homes.

Supporting documentation:

1. For BC Energy Step Code compliant homes:
 - a. Completed As-Built B.C. Energy Compliance Report; and
 - b. EnerGuide (N) Evaluation Homeowner Information Sheet.
2. For Passive House certified homes;
 - a. Completed As-Built B.C. Energy Compliance Report; and
 - b. Passive House Planning Package (PHPP), version 9 or newer, prepared by a Certified Passive House Designer or Certified Passive House Consultant.

Deadlines:

1. Complete your project within 12 months of the date of your pre-approval confirmation email.
2. Submit the post-construction application and required supporting documentation within 6 months of the date of your As-Built B.C. Energy Compliance Report.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.

Effective date: For building permits issued on or after April 1, 2020

Additional rebates

ENERGY ADVISOR SUPPORT REBATE

Rebate requirements:

1. Applicants must receive a rebate for the Heat Pump pathway or Energy Step Code pathway to be eligible.
2. The EnerGuide (N) Evaluation and As-Built B.C. Energy Compliance Report must be completed by a **Program Qualified Energy Advisor**.

Heat pump type	Rebate	Rebate maximum
Energy Advisor Support Rebate	\$ 1,000 per individually modeled home or unit <input type="radio"/> \$800 to the Builder <input type="radio"/> \$200 to the Energy Advisor	Maximum one Energy Advisor Support Rebate per home or unit.

Supporting documentation:

1. For BC Energy Step Code compliant homes:
 - a. Completed As-Built B.C. Energy Compliance Report; and
 - b. EnerGuide (N) Evaluation Homeowner Information Sheet for each individually modeled home or unit.
2. For Passive House certified homes:
 - a. Completed As-Built B.C. Energy Compliance Report; and
 - b. Passive House Planning Package (PHPP), version 9 or newer, prepared by a Certified Passive House Designer or Certified Passive House Consultant.

Deadlines:

1. Complete your project within 12 months of the date of your pre-approval confirmation email.
2. Submit the post-construction application and required supporting documentation within 6 months of the date of your heat pump installation invoice or As-Built B.C. Energy Compliance Report, as applicable for your rebate pathway.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.

Terms and conditions—Rebate Eligibility Requirements

Effective date: For building permits issued on or after April 1, 2020

Additional rebates

ALL-ELECTRIC BONUS REBATE

Rebate requirements:

1. Applicants must receive a rebate for the Heat Pump pathway or Energy Step Code pathway to be eligible.
2. Home must not be connected to a piped or stored fossil fuel source (e.g. natural gas, propane or oil), including for any of the following uses:
 - a. space heating;
 - b. water heating;
 - c. cooktops or barbeques;
 - d. fireplaces;
 - e. clothes dryers; or
 - f. any other use that requires a fossil fuel source.
3. A **Program Qualified Energy Advisor** must declare that there is no fossil fuel connection or use in the home (i.e. no piping, meter, storage or associated equipment on the property).

Rebate type	Rebate	Rebate maximum
All-Electric Bonus Rebate	\$4,000 per home or unit	Maximum one All-Electric Bonus Rebate per home or unit.

Supporting documentation:

1. Completed As-Built B.C. Energy Compliance Report. A Program Qualified Energy Advisor must complete the following sections:
 - a. Section B, Other Impacting Features, indicating that there is no fossil fuel connection or use in the home (i.e. no piping, meter, storage or associated equipment on the property); and
 - b. Section F, Other Energy Modelling Metrics, indicating that natural gas, propane, and oil consumption are 0 GJ/year.

Deadlines:

1. Complete your project within 12 months of the date of your pre-approval confirmation email.
2. Submit the post-construction application and required supporting documentation within 6 months of the date of your heat pump installation invoice or As-Built B.C. Energy Compliance Report, as applicable for your rebate pathway.

Note: Additional Terms and Conditions apply. Visit betterhomesbc.ca for full details.
