

# About Airfoam

[Quad-Lock's](#) ICF system provides unmatched durability and insulation, creating a resilient and energy-efficient foundation for your home. Say goodbye to moisture issues and hello to a dry, comfortable basement all year round. The Quad-Lock ICF system combines the strength of reinforced concrete with the insulating properties of expanded polystyrene (EPS). The result? A robust, monolithic structure that stands up to extreme weather conditions while keeping your basement dry and secure.

Quad-Lock's innovative design accelerates construction timelines. With quick assembly and ease of installation, you'll have a dry basement in no time, reducing labor costs and ensuring project efficiency. Experience superior insulation with Quad-Lock's range of panel thicknesses, offering impressive R-values from R-22 to R-59. Your high-performance home will not only be dry but also energy-efficient, contributing to sustainability and lower utility bills.

About Us: [Airfoam Industries Ltd.](#) has been an industry leader in EPS insulation for over 35 years. As a leading provider of building materials in the construction market, we offer a range of solutions, including EPS foam insulation, insulated concrete forms, insulation with vapor barrier, insulated metal panels, geofoam, void fill, and flotation solutions. With our brands Quad-Lock, Quad-Deck, Korolite, and Airboard, we can provide you with building envelope solutions to make your project Net-Zero ready and Step-Code compliant. Feel free to ask us how we can elevate your build to the next level.
